North Branch Completes Addition and Renovation of Lamprey Health Care Center

(Nashua, NH) North Branch Construction has completed the addition and renovation of the former Home Health & Hospice Building located at 22 Prospect Street in Nashua. Lamprey Health Care will relocate their Nashua center into this building, which is located within the Southern New Hampshire Medical Center's medical services campus.

The scope of work included the total gut renovation of the existing 11,600 square foot facility, plus a new 9,600 square foot 2-story wood framed addition. The project also included demolition of an house and garage to make way for a new parking lot and second entrance to the new medical office building. Asbestos abatement in the existing building was also completed. This building will serve as medical offices and a treatment facility center.

Lamprey Health Care is one of the oldest private medical services company in the state of New Hampshire, and operates two other centers located in Newmarket and Raymond. Dennis Mires, The Architects, of Manchester provided architectural design for this project.
